built-in digital answering machine on the OFX 570

high-quality printing with ink-jet technology

### **INK-JET TECHNOLOGY FOR HIGH-QUALITY DETAILS.**

Ink-jet technology is the ideal solution when you want clean, top-quality printing in the finest detail. With higher definition and a softer greyscale.

With the OFX 550 and 570 you can receive and print on plain paper and the printhead gives you excellent operating autonomy and unbeatable simplicity.

### **ONE FAX AFTER ANOTHER.**

The Olivetti OFX 550 and 570 are fully-featured professional fax. The automatic document feed holds up to ten pages. The 14,400 bps modem transmits a page in just 7 seconds. The 21-page memory enables documents to be broadcast to up to 15 numbers, in deferred mode if required. Both models come with an 80-sheet paper tray, to prolong operating autonomy between one re-stocking and another.

### **A FULL OPTION AND TECHNICALLY ADVANCED TELEPHONE.**

The OFX 550 and 570 is equipped with a telephone which offers the most updated solutions: distinctive ringing, CLIP function (caller line identification presentation), silent reception, automatic access to an alternative telephone carrier or to a prefixed code, hands-free dialing, conversation on hold and a directory up to 84 numbers.

### **ORIGINAL OR COPY?**

The Olivetti OFX 550 and 570 offer an extra resource, a useful copy function with a zoom for enlargements and reductions of the original.

With this easy-to-use function, you can make up to 9 copies of the original and select text or photo copy mode for optimised reproduction quality.

### **WHEN YOUR SECRETARY GOES ON HOLIDAY**

With the OFX 570, your secretary can take a break: in addition to the telephone, fax and copy functions, it also provides a versatile high-capacity digital answering machine. So the fax will answer the phone, and give callers a good 20 minutes recording time.

You can also store personal memos, with memory guaranteed in the event of a power cut.

You can listen to voice mail on the answering machine via the built-in telephone, for maximum privacy. If you have to go out, the answering machine can be programmed to transfer messages to a pre-set number at a specified time.

And if you forget to tell it where you're going, you can call your answering machine from a remote phone or mobile, and it will always be ready to respond!
